

SIGNAL INVERTER/AMPLIFIER UV 10

UV 10 is an amplifier increasing the current capacity of the voltage signal 0(2)...10 Vdc, or it can be used for inverting the signal.

UV 10 is loading the input signal about 0,5 mA and the maximum output current capacity is 20 mA.

Wiring

Signal selection

Input signal	Output signal	Jumpers
0...10 V *)	0...10 V *)	
0...10 V	10...0 V	
2...10 V	10...2 V	

*) Factory setting

Technical data:

Supply	24 Vac/dc (22...28 V), < 2 VA
Input	0(2)...10 V, < 0,5 mA
Output	0(2)...10 V / 10...(2)0, max. 20 mA
Output accuracy	
Factory setting	< 1 %
Any other setting	1,5 %
Dimensions (w x h x d)	22,5 x 77 x 42 mm

Ordering guide:

Model	Product number	Description
UV 10	1182160	amplifier / inverter

Products fulfill the requirements of directive 2004/108/EC and are in accordance with the standards EN61000-6-3 (Emission) and EN61000-6-2 (Immunity).
